

HOSPITAL PREPAREDNESS PROGRAM

NEW MEXICO

HPP FUNDING

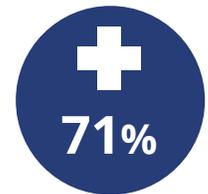

39% decrease in funding
since FY 2013

HIGHLIGHTS

- New Mexico (NM) uses HPP funds to build a robust emergency preparedness and response foundation for the state’s population of 2 million
- A broad spectrum of health care provider types actively participate in New Mexico’s four health care coalitions (HCC)
- The ARCH-P coalition in the Albuquerque area is the state’s largest coalition, serving over 50% of the population in New Mexico
- NM collaborates and coordinates preparedness and response activities with 23 tribal nations within state boundaries

HCC CORE MEMBER PARTICIPATION

of hospitals

of Emergency Medical Services

of public health departments

of emergency management organizations

SPOTLIGHT ON PREPAREDNESS: Strengthening Countermeasures

- NM deployed equipment and personal protective equipment caches to all four HCC regions to improve resource availability
- Each region established a Highly Infectious Disease (HID) sub-committee to plan for a high-consequence event that may involve an HID element and could affect patient care outcomes
- The HCC partnered with NM Department of Health’s Medical Countermeasures Management program to train health care facilities in closed point of dispensing (POD) operations to ensure facility staff have access to vaccines and other interventions

FY 2018 PRIORITIES

- **Community Resilience:** Identify fiduciary agent to manage grant deliverables for all four coalitions to ensure federal investment is distributed to the coalition members
- **Incident Management:** Revise actionable Essential Elements of Information (EEI) dashboards to include new inputs and outputs considered in a disaster affecting health care facilities so continuity of information sharing can be achieved
- **Countermeasures & Mitigation:** Conduct trainings throughout the state to heighten awareness of the probability of a Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) event affecting health care facilities
- **Exercises:** Conduct Coalition Surge Tests at all four coalition sites to assess medical surge capabilities and improve patient evacuation operations
