

HOSPITAL PREPAREDNESS PROGRAM

FLORIDA

HPP FUNDING

37% decrease in funding
since FY 2013

HIGHLIGHTS

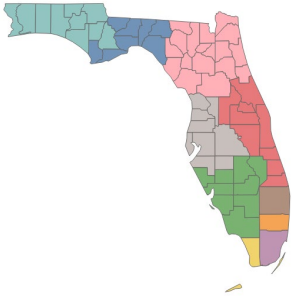

- Florida (FL) uses HPP funding to build and expand its preparedness and response network to support its nearly 22 million residents.
- All of FL's health care coalitions (HCCs) have a non-profit fiduciary agent.
- HCCs in FL are rapidly growing: all coalitions have strong governance structures and are developing sustainment strategies to become autonomous partners with state Emergency Support Function 8 (ESF-8).

SPOTLIGHT ON RESPONSE

The Central Florida Disaster Medical Coalition, one of Florida's ten HCCs, was provided experienced incident command staff to lead Rapid Emergency Support Teams (REST). These teams conducted assessments, implemented infection control measures, and administered testing in Florida's long-term care facilities during the COVID-19 response. This collaborative effort assisted in response efforts throughout the COVID-19 pandemic.

COVID-19 RESPONSE

- In 2020, additional supplies and equipment were purchased to keep response teams mission-ready.
- FL deployed 4 of its 8 response teams on COVID-19 missions to provide decontamination assistance and thereby help prevent disease spread in long-term care facilities.
- The FL Department of Health used medical services contracts with nurses and emergency medical services (EMS) to support REST teams that provided assessments, infection control, and testing at long-term care facilities.

10 Health Care Coalitions

HCC CORE MEMBER PARTICIPATION

of acute care hospitals

of emergency medical services

of public health agencies

of emergency management agencies

FY19 end-of-year data, HCC count, and map as of 6/30/2020. Participation rate equals # of HCC member organizations divided by the total # of organizations in FL.
