

HOSPITAL PREPAREDNESS PROGRAM

OKLAHOMA

HPP FUNDING

38% decrease in funding
since FY 2013

HIGHLIGHTS

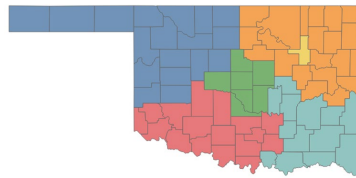

- Oklahoma uses HPP funding to build a robust emergency preparedness and response foundation for the state's 4 million residents.
- Oklahoma health care coalitions (HCCs) engage in emergency response efforts as part of the state's Regional Medical Response System, which functions as an arm of Emergency Support Function 8 (ESF-8) under the Oklahoma State Department of Health (OSDH).
- The HCCs across the state have found innovative response techniques that will be incorporated as best practices in future plans.

SPOTLIGHT ON RESPONSE

The OSDH, in collaboration with the HCCs, designed and implemented two request forms for ventilators and monoclonal antibodies. The development of these forms provided better access to equipment and resources and allowed for staff to allocate and deploy them efficiently. The outcomes have included over 14,000 doses of Bamlanivimab allocated and distributed across Oklahoma. The state has also deployed various ventilators to numerous hospitals.

COVID-19 RESPONSE

- The HCCs coordinated to improve information sharing and situational awareness for medical surge operations.
- In collaboration with the HCCs, the Emergency Preparedness and Response Service (EPRS) provided staffing assistance to augment staff needs for continued operations.
- Oklahoma coordinated a response to fill medical needs and provide the HCCs resources such as oxygen concentrators, ventilators, and continuous positive airway pressure (CPAP) machines.
