

HOSPITAL PREPAREDNESS PROGRAM

WISCONSIN

HPP FUNDING

39% decrease in funding
since FY 2013

HIGHLIGHTS

- Wisconsin has seven health care coalitions (HCC) across the state. One area of focus for future planning is to increase the response roles of the HCCs.
- Wisconsin has a population of nearly 5.8 million people that are served by the Wisconsin Department of Health Services (DHS).
- DHS plans to enhance capacity related to program capabilities. This will be done in part through HCC maturation and strategic planning.
- DHS plans to work with the HCCs to promote membership with additional community partners to foster greater HCC resilience.

HCC CORE MEMBER PARTICIPATION

SPOTLIGHT ON RESPONSE: Synthetic Cannabinoid Crisis

Wisconsin, like many states, has a number of patients who have used synthetic cannabinoids, often with adverse effects. As of July of 2018, there were 37 confirmed cases across the state. DHS distributed information and developed systems to help mitigate this emerging threat. For example, DHS provided fact sheets, warnings, health care questionnaires and guidance for clinicians and the general public to reduce the adverse impact of this crisis

FY 2018 PRIORITIES

- Work closely with emergency management and other agencies to update the emergency response plan.
- Work with an executive steering group to facilitate HCC governance development through technical assistance and by providing templates.
- Begin development of a recovery plan by the end of the budget period.
- Work with an executive steering group to develop a toolkit for specialty medical surge that will enhance response.
