

By the Numbers: **Data-Driven HPP Program Management**

Georgia
Health Community
Preparedness Program

July 23, 2009

Data Collection

How We Use Data

- Allocation of HPP funds
- Targeting of staff activities
- Everyday decision-making
- Structured planning processes
- Requests from response partners
- Document progress

Allocating HPP Funds

- Individual Facility Resources
 - Equipment
 - Supplies
 - Pharmaceuticals
- Public Health District Stockpiles
- Program staffing
- Training
- Exercises

Targeting Staff Activities

- Plan templates
- Technical assistance
- Facilitated regional planning
- Training
- Exercises

Example: Follow-up on Resources Provided Emergency Communications Systems

- 73% have written policies for emergency communications systems
- 71% have trained staff
- 71% have conducted exercises

Example: Follow-up on Resources Provided Responding Hospitals

Responding hospitals with ECUs Staff Trained in Their Use

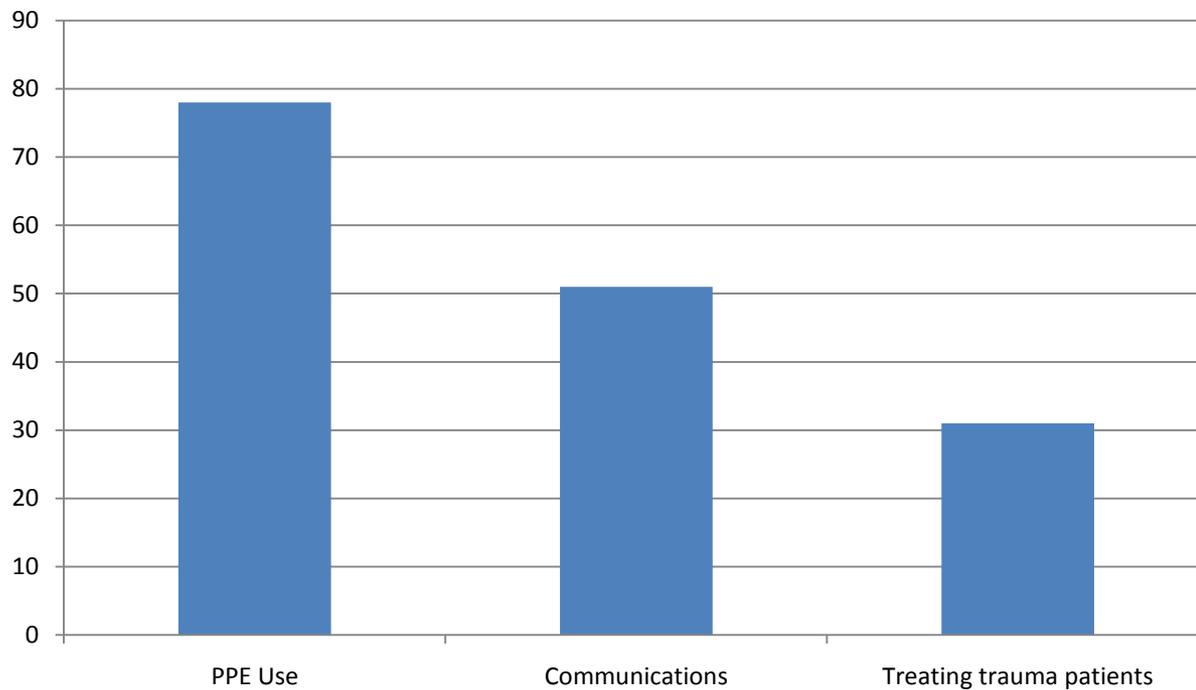

Responding hospitals with ECUs

Staff Trained, Exercises Conducted

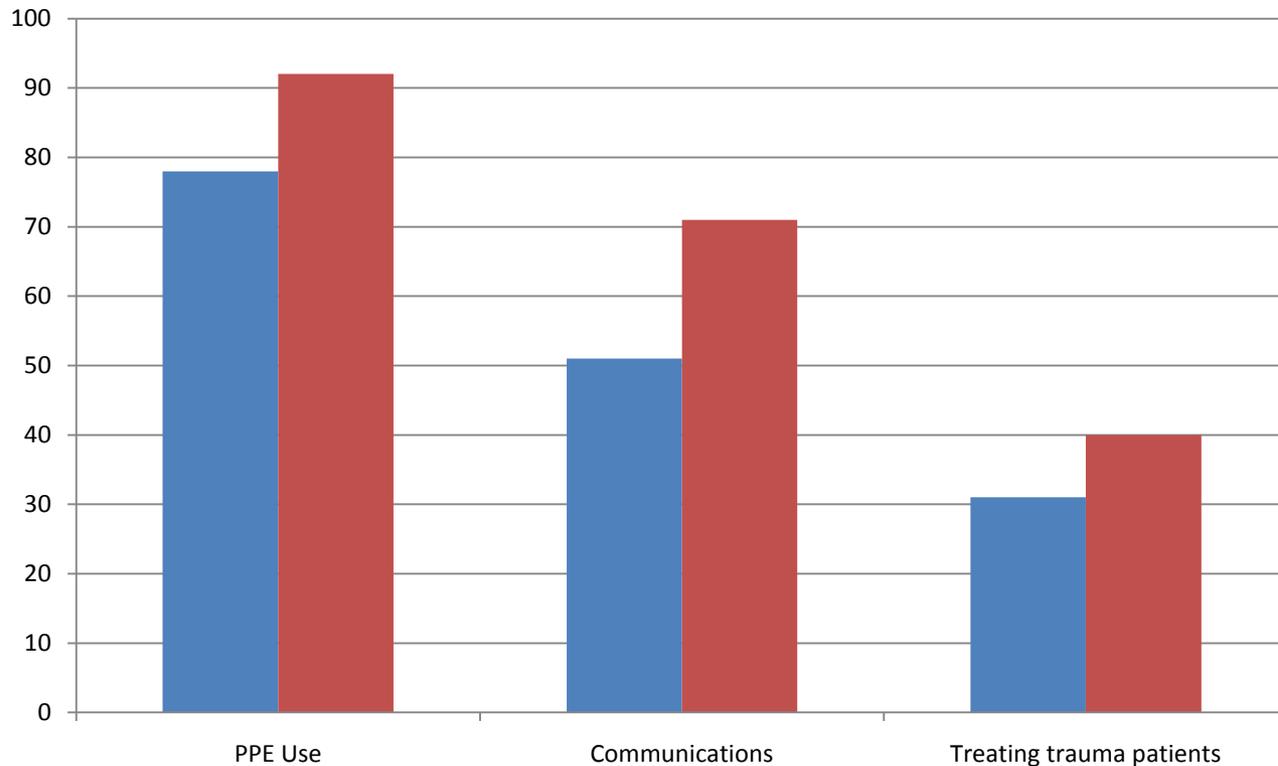

Training

Percentage of hospitals that have conducted training:

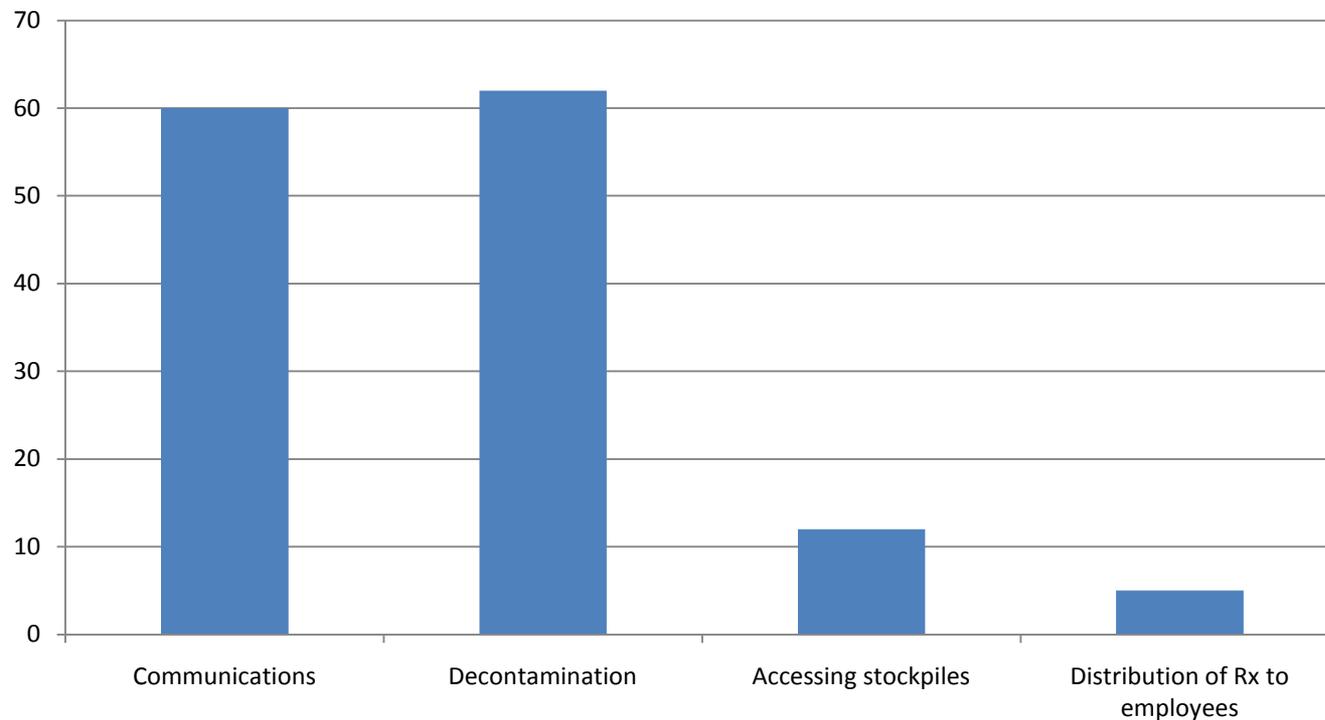

Improvement in Training 2006 - 2008

Percentage of hospitals that have conducted training:

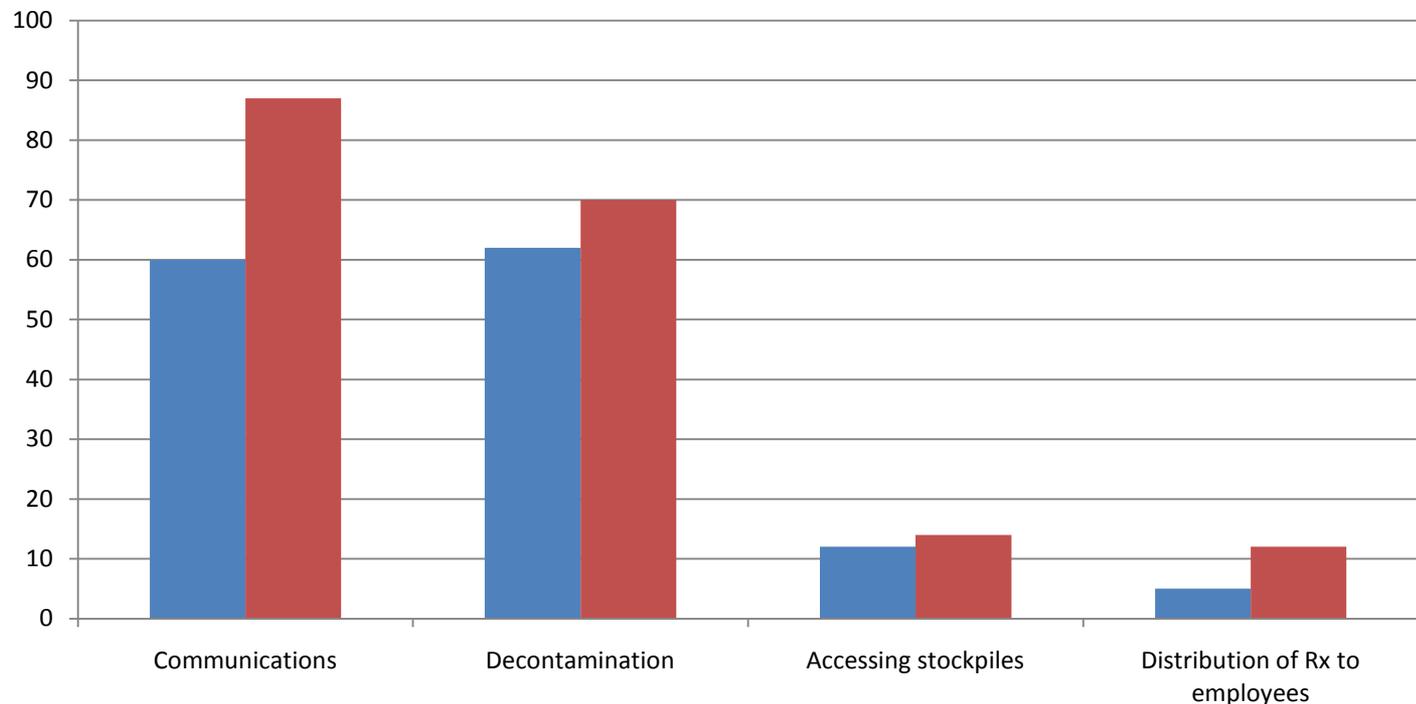

Exercises

Percentage of hospitals that participated in exercises:

Improvement in Exercises 2006 - 2008

Percentage of hospitals that participated in exercises:

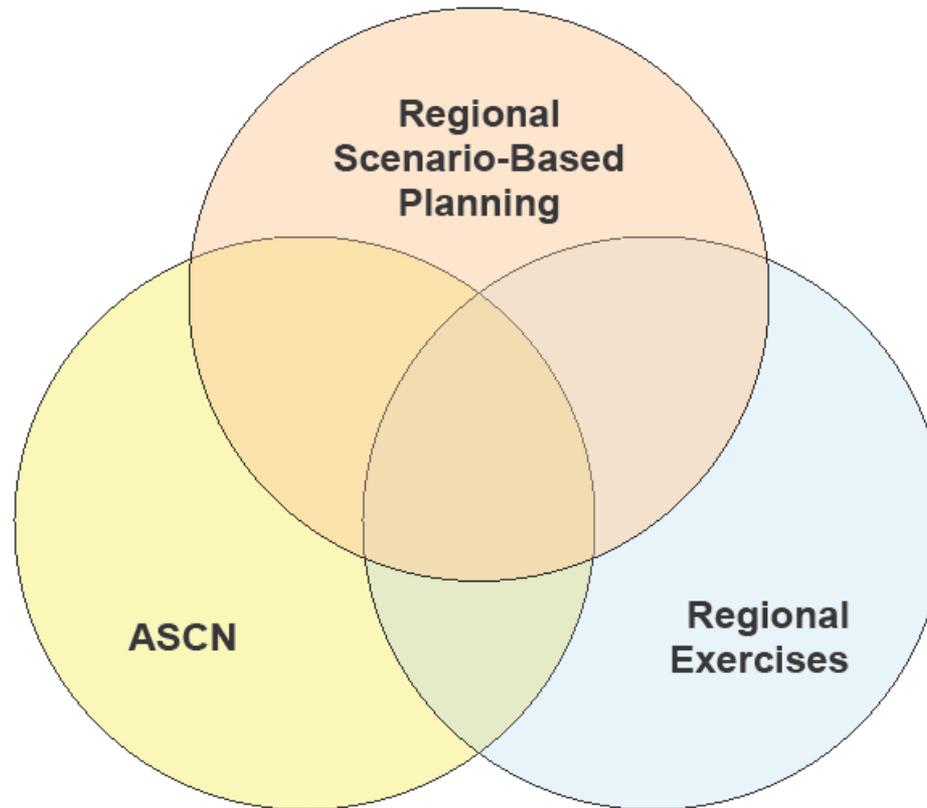

Structured Planning Process

Regional Scenario-Based Planning

- Data identifies current resource
- Computer simulation identifies bottlenecks
- Worksheets to analyze capacity
- Templates to standardize response plans
- Exercise program to test the regional plans

Integrated not Duplicated Processes

Final Note

Data is a ***starting point*** for analysis, discussion and planning.
