The Delaware Public Health and Medical Advisory Group Prioritization of Ethical Values is designed to guide the Group in its decision-making process when ethical recommendations are requested by the Division of Public Health. The principal ethical values are categorized into five tiers. The Group will determine which tier applies to the public health situation presented. The tiers are in order of priority, with ethical values of higher priority at the bottom of the pyramid. This diagram serves as only a guideline to aid members of the Group to organize thoughts and ideas to provide the most ethically appropriate recommendations to the Director of the Division of Public Health.
