

FEDERAL RESPONSE BY THE NUMBERS FLINT, MICHIGAN

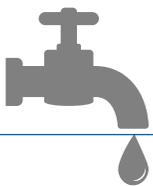

The U.S. Department of Health and Human Services (HHS) is coordinating efforts with federal agencies, including the Environmental Protection Agency (EPA), Federal Emergency Management Agency (FEMA), Small Business Administration (SBA), the Department of Agriculture (USDA), and the Department of Housing and Urban Development (HUD) to respond to the water crisis in Flint from January 2016 through December 2016. By September 2016, federal agencies had provided more than \$51 million in additional grant funding to state and local agencies and organizations in addition to in-kind services, commodities and technical assistance to meet the needs of Flint residents. In December 2016, Congress provided an additional \$170 million for Flint recovery efforts including pipe replacement.

PERSONNEL

up to 106 Federal Staff

at the height of the response were on the ground in Flint working with residents, community leaders and officials from state and county agencies. Federal staff continue to support the community.

ENSURING ACCESS TO SAFE WATER

more than **26.9 million** liters of water were provided to the state of Michigan by FEMA, plus 50,000 water and pitcher filters, and 243,842 filter replacement cartridges between January 19 and August 14, 2016.

100 percent of HUD-insured and HUD-assisted properties have water filters installed and these filters are being kept up to date.

\$325,000 of a HUD existing lead-paint hazard grant for public housing in Flint that was approved for use in this crisis.

6,600 water samples have been taken by EPA from nearly 700 properties for multiple types of tests. Tests have shown that filters on home faucets are removing lead. Tests also show the system continues to recover.
